Address: 4153 Monarch Ave Canton, MI 48188

Description of Services:

iLEARNED Online takes a unique individualized approach of 1:1:1 tutoring tailored to Texas learning standards. By 1:1:1 we mean the student has a live, personal tutor online and also a tutor present in the computer lab to assist in the learning process. The student uses an interactive whiteboard where the online tutor teaches lessons and corresponding worksheets are completed in an online real-time collaborative environment. The tutor sees what the student is doing and can easily send supplementary material immediately if the student does not understand the topic. Interaction is also via online voice/text chat. The classroom tutor is also available for questions or clarification. This unique approach allows multiple touchpoints between the online tutor, classroom tutor and student to allow for a truly personalized experience. Furthermore, the program allows parents and the student to review the session afterwards. This is especially helpful as the student's learning continues even after the session is over.

Description of Instructor Qualifications:

All tutors have at least a Bachelors Degree Education level.
Tutors have extensive knowledge of computers and collaborative software technology.
Before hiring, tutors have been tested in their knowledge of math and reading.
After hiring, tutors receive continuous training and testing in Math and Reading.
Our tutors are also heavily trained in teaching methods and skills.

Description of Evidence of Effectiveness:

iLEARNED Online's tutoring program has had a positive impact on students' achievement in reading and math. Last year, our students in Flint, Michigan took the ACHIEVE standardized pre and post tests before tutoring began and at the end of our program. Based on the test results, the Flint students showed an average 24.2% increase. Our students in Detroit last year also took the ACHIEVE standardized tests before and after iLEARNED Online's tutoring program. The students, all of whom spoke English as a second language, showed an average 33.4% increase in test scores. Our staff has been working with academically at risk students including African American, Caucasian, Hispanic, Bengali, Indian, and Pakistani students in Detroit and Flint, Michigan for the past three years and we have seen great improvements in their reading and math skills at the end of our program.
