

August 2020

Welcome!

The year has started 100% online with virtual classrooms – something never before seen in the history of public education. At San Elizario High School, we are committed to providing a quality education for all students, despite the situation. I propose that we all work together to make the 2020-21 academic school year a success. As educators, we want to unite with the families of the San Elizario community to help students continue in their efforts to graduate.

Our plan is to continue with events and clubs to the extent that is realistically (and safely) possible. Our faculty and staff members are working to come up with ideas on how to engage students overall – not just in the classrooms, but also with clubs, athletics, and other activities that help create positive memories.

Thank you for your support.

April Marioni, Principal
